PARROT TULIP, "Fantasy"

A lovable vagabond which has successfully thrown off the conventional Tulip form. Buds are like huge pointed candle flames of salmon-rose. The edges of the closed flower are informally curved and deeply laciniated, apple-green shadows rise from the outside base almost the entire length of the petals. When fully opened, we have a broad petalled flaring and loosely built flower of brilliant salmon-rose on a 22-inch stem. A true expression of rhythmic freedom.

\$1.65 per doz.; \$3.00 for 25; \$11.45 per 100

Parrot Tulip, Fantasy

H. & V. GUIDE TO AUTUMN PLANTING

September

Late August or early September is the best time to start a new lawn or reseed the old one. This is the most important month for planting bulbs in the garden to bloom next spring, including Narcissus, Camassia, Dog's Tooth Violet, Snowflake, and Wood Hyacinths. Late in the month plant Dutch Iris.

October

All the bulbs recommended for September planting can still be started this month. October is the most important month for planting Tulip bulbs. By the middle of the month perennial plants are available and during the latter part dormant Roses should go in the ground. By the middle of the month make your first planting of Paper-White Narcissus, Soleil d'Or Narcissus, and Chinese Sacred Lilies indoors. Make sure you have sufficient bulbs of these to make succession plantings two weeks apart until mid-March. This is the month to plant Lily bulbs.

November

Continue planting Lilies throughout this month. There is still a chance to plant the many types of bulbs recommended for September and October planting, also perennial plants and Roses, as long as the ground is free from frost.

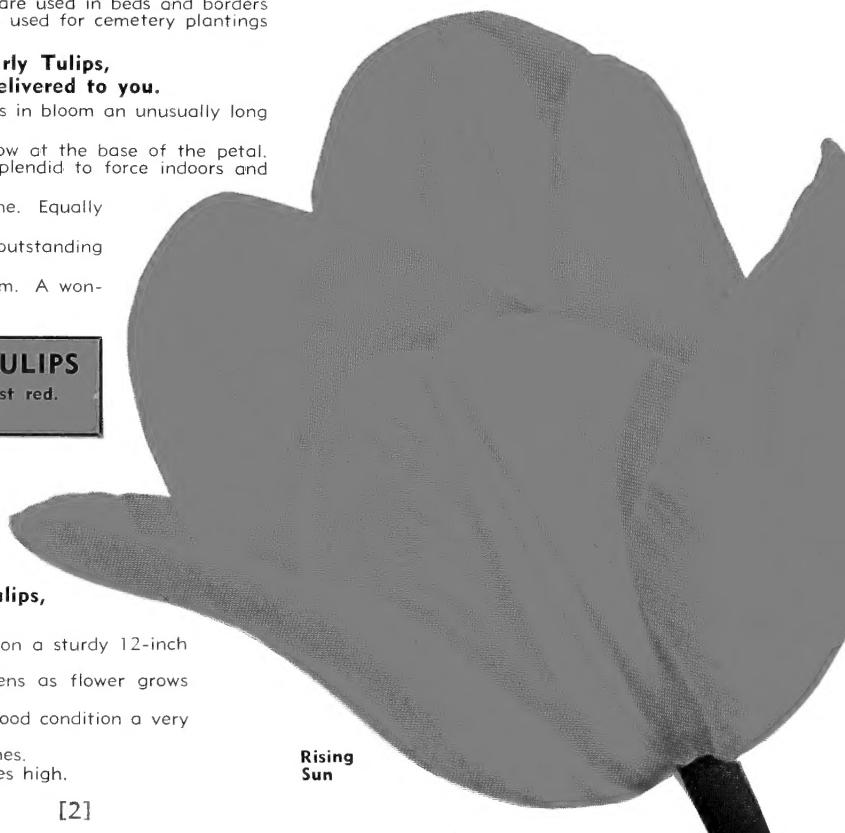

December

Throughout December start bulbs of Paper-White Narcissus, Soleil d'Or Narcissus, and Chinese Sacred Lily.

Hart & Vick's Special Mixture of Colors of Double Flowering Tulips

A careful blending of ten colors that make a brilliant show.

\$1.25 per doz.; \$2.40 for 25; \$9.25 per 100.

Rising Sun

SLENDER MAY-FLOWERING or COTTAGE TULIPS

These long-pointed flowers of the English Garden or Cottage Tulip type are indescribably graceful and lovely. In the opinion of plant enthusiasts, they dominate the Tulip family and are the backbone of the Tulip garden. Cottage Tulips begin flowering as the Single and Double kinds fade and continue in bloom well into the late Darwin and Breeder season. Be sure to include these Cottage Tulips in your planting. They bridge the gap between the early and late varieties.

AVIS KENNICOTT. A very long vase-shaped flower of rich yellow with ivory stamens. We recommend this flower very highly. 26 inches high. **\$1.55 per doz.; \$2.95 for 25; \$11.00 per 100**

DIDO. A perfect flower, bewitching dark coral-pink, marked with light orange; inside of petal marked green and yellow. Delightfully fragrant. Height 28 inches. **\$1.55 per doz.; \$2.95 for 25; \$11.00 per 100**

GRENADEIER. A very fragrant Tulip of flame-orange. One of the most brilliantly colored of all Tulips. 26 inches high. **\$1.55 per doz.; \$2.95 for 25; \$11.00 per 100**

INGLEScombe PINK. Delicate pink flower tinted with salmon. An old variety but still one of the loveliest. 24 inches high. **\$1.30 per doz.; \$2.45 for 25; \$9.45 per 100**

MRS. MOON. A beautiful, large urn-shaped flower with pointed reflexing petals of very deep golden yellow. A fine type of Cottage Tulip and, unlike Moonlight, should be used with deep blue and purple flowers in the garden. Fine for forcing. TRIUMPH TULIPS

We have offered these Triumph Tulips in this Autumn Bulb Book for the past four years. We have had the opportunity to judge their value in the gardens of many friends and customers. In our opinion these newer Tulips deserve a place in every Tulip planting. They have certain qualities that are not found in other classes. The flowers are for the most part very long-oval in shape, of beautiful form. Their size is most unusual. The colorings strong and clear. Stems sturdy and straight. We recommend that you try some of these in your own garden. They bloom just after the Early Tulips are finished.

Prices on all these Triumph Tulips,
\$1.65 per doz.; \$3.00 for 25; \$11.45 per 100.

U. S. A. Probably the finest Tulip of this most attractive combination of colors. Rich orange-red, apricot and peach-pink margined at the edges of the petals with buff and yellow. Narcissus and Daffodils • Plant Now

Narcissus and Daffodils are very easy to grow in the garden, for they thrive in any good soil and in just about any location. Plant them in clumps of six to a dozen bulbs among the perennial plants and in the foreground of shrubbery and evergreens. Planted in large masses through woodlands and along hillsides and in meadows they give a most pleasing effect. They will increase in beauty and number without any special care and soon become permanently established. Plant Narcissus bulbs about 4 inches deep and 6 inches apart and **get them into the ground as early in the fall as possible**.

One of the finest things that can be done with a piece of open, waste land is to plant it broadcast with hundreds of Daffodil bulbs. While they will not endure complete shade, any open, semi-shaded area will suit them, and they will riot with the utmost freedom in a sloping meadow, particularly at the sides of streams or small lakes.

When Daffodils are to be naturalized, they should not be planted in regular rows or at even distances apart. The best thing is to carry a basket of bulbs over the ground, spilling them irregularly and planting the bulbs where they fall. It will take several years to achieve the full value of a naturalistic planting, and the Daffodils should be left entirely undisturbed during that period. The foliage should never be cut off, but allowed to ripen and wither away naturally.

If the ground is fairly moist and shady, an interplanting of **Mertensia** is extremely effective, and the new **Anchusa myosotidiflora** is also a very beautiful plant to combine with naturalized Daffodils.

Fall Is Best Time to Make a Lawn

The cool moist weather during the fall months is ideal for making new lawns or reseeding old ones. The seed germinates quickly, the grass seedlings get a sturdy growth and then the turf improves very rapidly when spring comes. Fall sown grass seed crowds out weeds and makes a turf that will withstand summer drought better.

HIGHLAND PARK GRASS SEED

99.90% Weed Free

This mixture has proved its worth by producing beautiful and permanent lawns for the city home, country estate, and public park. It is a careful blending of outstanding recleaned turf-making grasses including bent grass and the famous English clover. It will make a thick, deep-rooted, velvety evergreen sod that will hold the moisture and remain fresh and green during the dry season in summer. This is our most popular Grass Seed Mixture. It has proved its quality not only on the smaller lawn of the city and suburban home, but has been and is being used with splendid results in many of the city parks, cemeteries, and large estates. Professional landscape gardeners specify that they will use Highland Park Grass Seed when submitting plans to particular patrons. The name "Highland Park" is a symbol of quality. Sow at rate of 1 lb. to each 250 square feet of new lawn, reseeding 500 square feet of old lawn.

1/2 lb. 35c; 1b. 60c; 2 lbs. \$1.10; 3 lbs. \$1.60; 5 lbs. \$2.60; 10 lbs. \$5.00; 25 lbs. \$12.00; 50 lbs. \$23.50; 100 lbs. \$45.00. Delivered, transportation paid.

Many people prefer a lawn without clover in it. For those who do, we omit the clover from our Highland Park Mixture, adding more Bent Grass. Just order Highland Park without Clover. Same high quality, same price.

SHADY NOOK LAWN MIXTURE

On many lawns there are unsightly bare spots under trees and between adjoining houses where it is impossible to get the ordinary lawn grass to grow. Our mixture for shade is made up of short-growing, fine-leaved, shade-loving grasses that will give you an evergreen sod in the most densely shaded spots. Sow at rate of 1 pound to each 200 square feet of new lawn; reseeding 350 square feet of old lawn.

1/2 lb. 40c; 1b. 75c; 3 lbs. \$2.10; 5 lbs. \$3.35; 10 lbs. \$6.50; 25 lbs. \$15.75; 50 lbs. \$30.50; 100 lbs. \$60.00. Delivered, transportation paid.

TERRACE GRASS MIXTURE

Banks and terraces need deep-rooting, very hardy grasses to hold them in place. In this special mixture we have combined varieties that will quickly form a thick, matted sod that will keep the bank from washing in heavy rains, and remain fresh and green all season. We recommend sowing grass seed for terraces at the rate of 1 pound to each 200 square feet. If the slope is very steep, mix 1 quart of oats with 1 pound of seed and sow on each 100 square feet.

1/2 lb. 35c; 1b. 60c; 3 lbs. \$1.60; 5 lbs. \$2.60; 10 lbs. \$5.00; 25 lbs. \$12.00. Delivered, transportation paid.

Hints That Help Make Good Lawns

A little good grass seed sown spring and fall, 1 pound to 400 square feet, will keep the weeds out. Grass under trees needs double the food and water that sunny lawns do. Mow your lawn often with the mower set so that it leaves the grass an inch long, especially during hot weather.

Peat moss spread on the lawn, 1 bale (18 bus.) to 1000 square feet, keeps grass green all season. Don't "sprinkle" your lawn every night. Soak it twice a week. Get the moisture down where the roots will go down after it and make a thick turf.

TWO GOOD WINTER MULCHES

For Your Lawn and Garden

PEAT MOSS

Fine for mulching the rose and perennial bed. Retains moisture, keeps the earth from drying and cracking, breaks up clay, and binds together sandy soils. Spread over and raked into the grass, it holds moisture and keeps the lawn green throughout the summer. Use it freely.

10-bu. carton, \$2.95; 18-bu. bale, \$4.75

TOBACCO STEMS

Shredded tobacco leaves and stems that make a wonderful mulch and top-dressing for lawns and gardens. Retains moisture, feeds plants, drives away bugs. Spread a protecting layer over your rose and perennial beds.

25 lbs. \$1.25; 50 lbs. \$2.00; 100 lbs. \$3.50; 500 lbs. \$16.00.

ASPARAGUS ROOTS

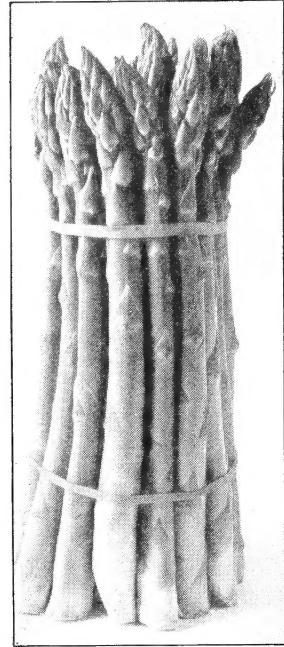

The popularity of Asparagus in the home garden is growing rapidly, as people learn how easily it may be raised, and how much better the flavor is when cooked immediately after cutting. Asparagus begins to lose flavor 20 minutes after being taken from the ground. A small bed 12 feet wide and 25 feet long will hold 100 plants and yield sufficient Asparagus for the family of ordinary size. Soak the seed in warm water for 24 hours, then sow an inch deep in rows a foot apart. The following spring set the best of the plants in the permanent bed.

MARY WASHINGTON. A rust-proof Asparagus that is very fast growing, exceedingly tender, of excellent flavor, and that produces heavy stalks 1 to 2 inches in diameter. **Two-year-old freshly dug Asparagus roots.** For quickest returns plant these large roots. They will give you some Asparagus this season, and a very good crop next year and for many years to come.

New MacDonald Red RHUBARB

We believe this new red Rhubarb to be just about the peak of perfection in Rhubarb. The plant is very vigorous and makes stalks very early. These stalks are very long and thick. The flesh is bright red in color, making the sauce deep pink. The flavor is unique. MacDonald requires less sugar than the older kinds. Plant some of this new Rhubarb this fall. It yields heavily and lasts a lifetime.
